

InterTalks Internal Document Management Policy

This policy document defines the guidelines, responsibilities, security standards, and operational procedures for handling internal documents within the InterTalks platform.

1. Purpose

The purpose of this policy is to ensure that all documents uploaded, reviewed, approved, stored, and shared within the InterTalks platform are managed securely, consistently, and in compliance with organizational standards.

2. User Roles and Responsibilities

VIEWER users may only view approved documents. CONTRIBUTOR users may upload and edit draft documents. REVIEWER users may review submissions and provide feedback. ADMIN users have full control over approvals, lifecycle management, and audits.

3. Document Lifecycle

Documents shall move through the following lifecycle states: UPLOADED → UNDER_REVIEW → APPROVED → DEPRECATED. Only approved documents may be visible to general viewers.

4. Security Requirements

All user accounts must authenticate using secure credentials. Passwords must be stored using hashed encryption methods. Refresh tokens must be revocable and securely managed.

5. Audit Logging

Every important system action including uploads, approvals, rejections, and searches must be recorded in audit logs.

6. Data Retention

Deprecated documents shall remain archived for a minimum period of 1 year unless explicitly removed by administrators.

Role	Permissions
Viewer	Read Approved Documents
Contributor	Upload and Edit Documents

Reviewer	Review and Comment
Admin	Full System Access
